

## Sunclass Airlines successfully implements NAVBLUE's N-Ops & Crew solution for its Operations Control Center.

Toulouse, France, 26<sup>th</sup> November 2020

### — Sunclass Airlines is the latest addition to NAVBLUE's Airline Community with the implementation of N-Ops and Crew.

With N-Ops and Crew, Sunclass Airlines will be able to manage all aspects of operations control, crew managements and network scheduling in a single highly configurable solution. This translates to enhanced situational-awareness and collaborative-decision-making across operations stakeholders.

Already a NAVBLUE customer following the recent deployment of *Flysmart+* EFB software, Sunclass Airlines (formerly Thomas Cook Airlines Scandinavia) is a Danish carrier, based in Copenhagen, and operates charter services from Norway, Sweden, Denmark and Finland, with a fleet of 10 aircraft (A321s and A330s).

The *N-Ops and Crew* solution is part of NAVBLUE's OCC Suite of solutions which also includes N-Flight Planning, N-Tracking for flight dispatchers and N-Crew Planning systems. NAVBLUE's OCC solutions are designed to be highly configurable with built in rules-engines, to flexibly integrate with other systems and to deliver manage-by-exception automation.

The Sunclass Airlines and NAVBLUE teams have effectively collaborated throughout the Sales and Delivery process to define the required scope and perform thorough due diligence, which has culminated in a successful on-time delivery and adoption of the N-OC solution for its Crew, Ops and Network Management"

Thomas Lagaille, Vice President Product Portfolio & Programmes at NAVBLUE, said: *"Since Sunclass Airline's rebranding and new ownership in October 2019, NAVBLUE has been privileged to be part of its ongoing ambition of reaching the next level of end-to-end digital Flight Operations processes and systems. NAVBLUE looks forward to continuing our collaboration and supporting Sunclass Airlines' Flight Operations strategic objectives and activities, now and into the future"*.

Torben Østergaard, CEO at Sunclass Airlines, said: *"The Go-Live of N-Ops & Crew marks the culmination of one of the largest Operations IT transformation projects our company ever have gone through. Throughout the project, we have been really pleased with the dedicated and professional delivery provided by Navblue. With the Navblue suite of solutions now in place, we're confident that we can continue our journey to streamline our processes and unlock efficiencies – all to ensure that our guests have their best weeks of the year"*

**About NAVBLUE:** NAVBLUE is an Airbus Services company, wholly owned by Airbus, and dedicated to Flight Operations & Air Traffic Management Solutions. NAVBLUE provides digital solutions and services, and supports both civil and military environments, on the ground and onboard any aircraft and offers expertise in a range of areas, including digital cockpit operations, Operations Control Centre (OCC) systems, Flight Ops Engineering, Performance Based Navigation (PBN) and Air Traffic Management (ATM). NAVBLUE employs 550 employees spread across the world, with offices in Canada, France, Sweden, Thailand, UK and US and representatives in several other countries across the globe.
