

skywise. Certified Partners

Unleashing the potential of data. Together.

About

We believe in opening the Skywise platform to seamlessly integrate cutting-edge developers with aerospace data will create even greater value.

With our Skywise Certified Partners, we provide collaborative power that

unleashes potential and increases utility of data to create impactful, high quality solutions with a shorter time to market. The program is dedicated to everyone in the aerospace ecosystem who wants to make the best possible use of data.

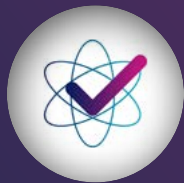

skywise. Certified Partners

Benefits

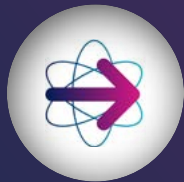

Utilize.

We give cutting-edge developers and integrators access to extensive digital aviation data. This is the basis for improving the creation of value adding solutions and optimization of airlines' operational performance. Growing business by turning data into value.

Assure.

We safeguard proper handling of data, ensuring the quality and reliability of partner solutions. Skywise follows reasoned criteria in the selection of new partners, providing training sessions and continuous information management support. Growing business with credible and capable partners.

Innovate.

We provide an ever-evolving ecosystem. It enables partners and airlines to jointly discover new ways of data usage and implement innovative solutions faster. Growing business by leading digital transformation.

Collaborate.

We enable more valuable players of the aerospace industry to enter the Skywise ecosystem easily and seamlessly. It opens the platform for expertise exchange, collaborative workflows and built-in solutions. Growing business by opening new opportunities.

Airlines making the best possible use of data with Skywise Certified Partners

Guaranteed high quality.

Skywise best practices for architecture and software development. Skywise Certified Partners benefit from dedicated training and certification so that they can develop more robust, richer applications within Skywise on behalf of airlines.

Highly secured architecture.

Airline data usage by Certified Users governed by Skywise GTUs.

Shorter time to develop, integrate and operate.

Thanks to privileged access to the Skywise software development kit (SDK/API) and toolset.

Lower risk.

Using controlled accounts and data access granted by Airline.
